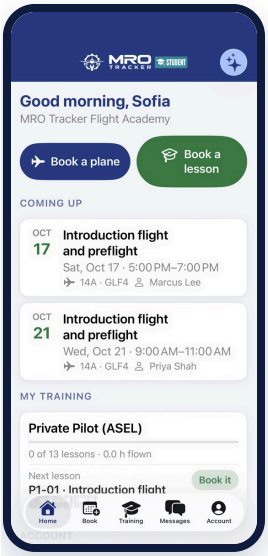
MRO TRACKER STUDENT · FOR FLIGHT SCHOOLS AND THEIR STUDENTS

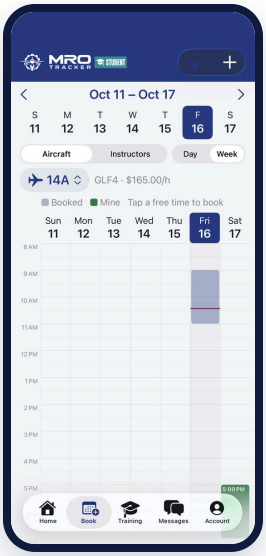
The flight school in every student's pocket.

MRO Tracker Student is the Student flavor of the mobile app for students and renters at schools that run MRO Tracker Flight School. Students book airplanes and lessons, follow their training lesson by lesson, see their endorsements, pay their invoices and get reminded before every flight, with their next flight on the Lock Screen. The school's own booking rules apply on the phone, exactly as they do at the front desk.

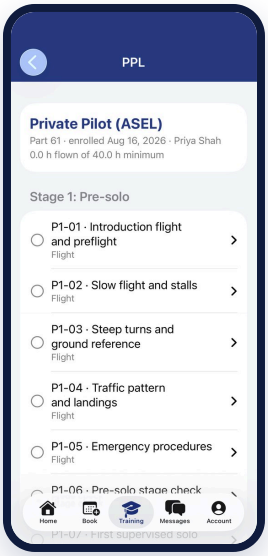
- Book planes and lessons
- Training progress
- Endorsements
- Balance and payments
- Flight reminders
- Lock Screen card



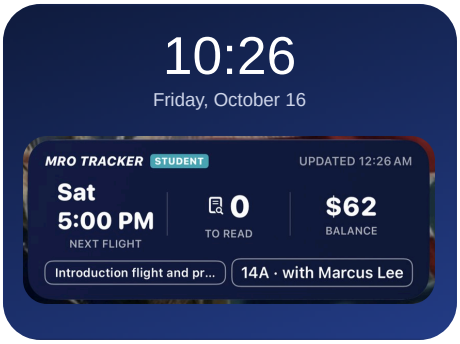
Home: coming up and next lesson



Book by aircraft or instructor



The course, lesson by lesson



The Lock Screen card: next flight, lessons to read and balance

Screens from the iPhone app with sample data.

FOR THE STUDENT

Everything about their training, in one app

Tab	What the student can do
Book	Book airplanes and lessons from a day calendar, by aircraft or by instructor. See right away whether the school's booking rules allow it, and change or cancel their own bookings.
Training	Follow each course lesson by lesson, read graded lessons with item grades and the instructor's comments, confirm "I've read this", and see their endorsements.

Tab	What the student can do
Account	See their prepaid balance, invoices with a Pay link, packages and activity, logbook totals and flights, endorsements and bookings. Sign in with Face ID; the app locks itself after 5 minutes without activity.
Messages	Messages with the school in the same app.
Reminders	A push notification the day before and the hour before each booking, and when a lesson has been graded.
Lock Screen	A Lock Screen card with the next flight, the lesson, the aircraft and instructor, lessons waiting to be read and the account balance: a Live Activity on iPhone and an ongoing notification on Android, switched on or off in Account.

FOR THE SCHOOL

Why it pays to put the app in students' hands

Fewer calls to the front desk

Students book, change and cancel on their own, and check their balance and progress without asking.

The rules still apply

Solo endorsements, checkouts, rental currency and balance limits are checked on the phone with the same settings as the front desk.

Reminders before every flight

Day-before and hour-before reminders and the Lock Screen card help students turn up on time and prepared.

Faster payment

Invoices arrive with a Pay link, and prepaid balances and packages are always visible.

Debriefs that get read

Students see every graded lesson and confirm they've read it, which becomes part of the training record.

One system

The app works from the same MRO Tracker data as the school, the dispatch board and maintenance, so an aircraft that is due can't be booked.

GETTING STARTED

How schools roll it out

1. Run the school in MRO Tracker Flight School (or migrate from Flight Schedule Pro or Flight Circle).
2. Students and renters sign in to the app with their MRO Tracker account: no separate setup.
3. Set your booking rules and reminders once; the app follows them.

Student seats are included in MRO Tracker Flight School, which is priced per aircraft. Students can also use MRO Tracker in the browser on any phone.
